**Remarks During Discussions With  
Prime Minister Obuchi of Japan and  
an Exchange With Reporters in New  
York City**

*September 22, 1998*

**President Clinton.** Thank you. I'd like to say to the members of the Japanese press, I'm sorry that you had to go all the way to Tarrytown and then come back. But at least you have seen it—we didn't even get to see it. [Laughter]

I want to welcome Prime Minister Obuchi and his team here. We have had very good meetings already today. The United States has no more important relationship in the world than our relationship with Japan. We are very interested in deepening our partnership in the security area, in the political area, and in doing what we can economically together to restore growth in the world and to stabilize the world financial situation. All these matters we have discussed today in a friendly and constructive atmosphere.

I just wanted to say one other thing. I invited Prime Minister Obuchi to come back to Washington early next year for an official visit, and he accepted, and I thank him for that.

**Prime Minister Obuchi.** All the strong and solid partnership between Japan and the United States could not lift this fog, and it is unfortunate that some of you had to go to Tarrytown and come back, and I'm sorry about that. But as the President said just now, I've been invited, and I've accepted his invitation to visit the United States in the early part of next year. And I look forward to meeting him again in Washington.

**Legislative Agenda**

**Q.** Mr. President, you've said how busy you are, but I just wonder if you haven't found some time to check with Congress about how things are going?

**President Clinton.** Well, we're just a few days away from the new budget year, and I'd say things need to go a little faster. We need an education bill; we need a health bill.

We desperately need the IMF funding. They need to pass a good Patients' Bill of Rights. There's a lot left to be done. Things are not going fast enough to suit me on the people's business.

**Common Agenda: Illustration of the  
New U.S.-Japan Cooperation**

*September 22, 1998*

Five years after the creation of the U.S.-Japan Common Agenda for Cooperation in Global Perspective, President Clinton and Prime Minister Obuchi recognized the valuable work accomplished by dedicated Japanese and American scientists, researchers and aid workers to fight diseases, preserve natural resources and exchange scientific data on various natural disasters and global climate change.

The participation of U.S. and Japanese private citizens, foundations and other non-governmental organizations in projects of the Common Agenda will enhance the impacts of these projects. Their participation is also expected to generate grass-roots public support. On September 23, 1998, U.S. and Japanese representatives of private-sector organizations (in Japan, the Common Agenda Roundtable) that support the Common Agenda will meet in Honolulu to discuss how they can assist in promoting the objectives of the Common Agenda.

The President and the Prime Minister welcome the first meeting of private sector representatives and made special mention of three projects:

1) The United States and Japan will work with the Government of Panama and non-governmental partners to preserve the Panama Canal watershed by developing a program to focus on environmental education and the training of local nongovernmental organizations.

2) In light of the recent forest fires which affected Southeast Asia, The United States and Japan will support efforts to address the underlying causes of the fires and assist local

governments to promote sustainable agriculture, forestry and land use.

3) The United States and Japan have been playing key roles in the success of efforts to eradicate polio worldwide. *However, significant challenges remain.* The two countries will strengthen their commitment to end the scourge of this disease through, among other steps, expanding cooperative eradication efforts by U.S. Peace Corps Volunteers and the Japan Overseas Cooperation Volunteers especially in African countries, *keeping in mind the importance of U.S.-Japan collaboration through TICADII (The Second Tokyo International Conference of African Development) to be held in October in Tokyo.*

### **Japan-United States Joint Statement on Cooperation in the Use of the Global Positioning System** *September 22, 1998*

On the basis of a series of discussions between representatives and experts of the Government of the United States and the Government of Japan, U.S. President William Clinton and Japanese Prime Minister Keizo Obuchi have issued this Joint Statement regarding cooperation in the use of the Global Positioning System (GPS) Standard Positioning Service for global positioning and other applications.

#### **Background**

GPS is a constellation of orbiting satellites operated by the United States, which provides signals to aid position-location, navigation, and precision timing for civil and military purposes. GPS, as an evolving system, is becoming more important for a wide variety of civilian, commercial, and scientific applications such as car navigation, mapping and land surveying, maritime shipping, and international air traffic management.

The United States Government is operating a maritime Differential Global Positioning System (DGPS), and the Government of Japan is operating a similar system. Both Governments are developing augmentation systems to support air navigation—the

United States is developing the Wide Area Augmentation System (WAAS), and Japan is developing the Multi-functional Transport Satellite (MTSAT)-based Satellite Augmentation System (MSAS).

The commercial GPS equipment and services industries of the United States and Japan lead the world, and augmentation systems to enhance the use of the GPS Standard Positioning Service could further expand civil, commercial, and scientific markets.

#### **Building a Cooperative Relationship**

The United States Government intends to continue to provide the GPS Standard Positioning Service for peaceful civil, commercial, and scientific use on a continuous, worldwide basis, free of direct user fees.

The Government of Japan intends to work closely with the United States to promote broad and effective use of the GPS Standard Positioning Service as a worldwide positioning, navigation, and timing standard. Both Governments are convinced of the need to prevent the misuse of GPS and its augmentation systems without unduly disrupting or degrading civilian uses, as well as of the need to prepare for emergency situations. Both Governments intend to cooperate to promote and facilitate civilian uses of GPS. It is anticipated that cooperation will:

- promote compatibility of operating standards for GPS technologies, equipment, and services;
- help develop effective approaches toward providing adequate radio frequency allocations for GPS and other radio navigation systems;
- identify potential barriers to the growth of commercial applications of GPS and appropriate preventative measures;
- encourage trade and investment in GPS equipment and services as a means of enhancing the information infrastructure of the Asia-Pacific region; and
- facilitate exchange of information on GPS-related matters of interest to both countries, such as enhancement of global positioning, navigation, and timing technologies and capabilities.

The two Governments intend to work together as appropriate on GPS-related issues that arise in the International Civil Aviation
